Date of analysis:	03/08/23 – 10/08/23

RESULTS

Parameter	Method of Analysis	Reporting Limit (RL)	MRL	Result
Pesticides in page 2, mg / kg	MTD pest.14 (GC – MS/MS)	0.01 / isomer		all < RL

Results are not corrected for recovery, unless otherwise reported. Uncertainty, if reported, refers to the expanded uncertainty at ~ 95 % confidence level ($k = 2$).

RL: The Reporting Limit is equal to or higher than the Limit of Quantification (LOQ) of the method.

MRL: Maximum Residue Level [Regulation (EC) No 396/2005]

Compliance Decision Rule: Document SANTE/11312/2021. Compliance, if the laboratory sample conforms to the maximum limit, taking into account the measurement uncertainty.

Note 1: MRL's, if available, are reported in case of detection of pesticides substances.

Note 2: The results refer to a reconstituted natural product (dehydration factor 4)
